

Query: “Could you help design a 3-day trip for a group of 4 from Las Vegas to Santa Maria from March 10th to March 12th, 2022? We have a budget of \$3,700. We have a preference for American and Mediterranean cuisines.”

AutoBuild
(GPT-4o)

Plan: [{"days": 1,... "accom.": Beautiful Manhattan 1br...}, {"days": 2,... "accom.": Beautiful Manhattan 1br...}, ...]

Incorrect: Invalid Accommodation – “Beautiful ...” **Does not obey minimum (3) nights rule.** ☹️

MAD (o3-mini)

Plan: [{"days": 1,... "lunch": Indian By Nature...}, {"days": 2,... "lunch": Indian By Nature...}, ...]

Incorrect: Invalid Restaurant – “Indian By Nature” **is repeated, does not obey diverse restaurants.** ☹️

LRPlan (GPT-4o +o3-mini)

Pattern Recognizer: “... cheapest viable accommodation for the **required nights...** Conservative Meal Planning...”

Rule Extractor: “... Accommodation Selection Rule... **Matches the required nights ...** Conservative Meal Planning Rule...”

Self Corrector: “... multiple adjustments to meal planning ... **Adjusting meal plans iteratively to have diversity ...**”

Correct Plan:
[{"days": 1, ..., "dinner": Pirates of Grill ..., "accom.": Cozy apartment ...}, {"days": 2, ... "breakfast": Indian By Nature ..., "lunch": The Drunk..., "dinner": Bintang..., "accom.": Cozy apartment...}, {"days": 3,... "breakfast": Nashta ...}] 😊
